

Kakawa v18 → v19 Quality Comparison

A negative-regression review showing which historical failure modes are now prevented by design and verified before release.

CLIENT	Kakawa Chocolates
EVIDENCE AS OF	2026-07-15
RUN	KAKAWA-ENT-20260715
STATUS	APPROVAL-READY

This report distinguishes verified evidence, derived analysis, professional judgment, and unavailable data. No client website or external platform was changed.

Regression outcomes

Failure mode	v18 observation	v19 control	v19 result
.com domain contamination	Recorded by the approved negative-regression brief	Approved-domain normalization plus manifest-wide URL scan	PASS — 0 wrong-domain URL records
Duplicate pages/files	Recorded by the approved negative-regression brief	Canonical URL dedupe and SHA-256 duplicate rejection	PASS — 0 duplicate normalized pages
Unsupported schema and disavow	Recorded by the approved negative-regression brief	Claim ledger, admin gate and disavow disabled by default	PASS — no deployable schema or disavow file
Generic redirects	Recorded by the approved negative-regression brief	Page-specific source/target evidence and graph validation	PASS — no unsupported redirect candidates
Stale QA	Recorded by the approved negative-regression brief	Fresh crawl as-of date, render evidence and immutable checksums	PASS_FOR_REVIEW
Contradictory counts	Recorded by the approved negative-regression brief	One canonical dataset and explicit reconciliation table	PASS — all listed counts reconcile

BENCHMARK CONCLUSION

v19 improves traceability and safety without pretending unavailable private analytics exist. That honesty is a quality feature, not an omission.
