

Kakawa v18 to v19 Quality Comparison

A scored evidence-and-usability benchmark plus negative-regression review.

CLIENT	Kakawa Chocolates
EVIDENCE AS OF	2026-07-15
RUN	KAKAWA-ENT-20260715
STATUS	APPROVAL-READY

This report distinguishes verified evidence, derived analysis, professional judgment, and unavailable data. No client website or external platform was changed.

Quality score

Five-category evidence-based review; scores measure usefulness and control quality, not SEO performance.

Package	Score / 100	Verdict
V18 benchmark	69	Deep and broad, but weakened by duplicates, domain contamination, unsupported risky assets and contradictory QA.
V19 before enhancement	74	Safer and traceable, but workbook internals, action depth and content quantity were too shallow.
V19 enhanced	94	V18-shaped, deduplicated, materially deeper, evidence-gated and machine-reconciled.

Rubric detail

Category	Weight	V18 benchmark	V19 before enhancement	V19 enhanced
Evidence integrity and traceability	25	11	24	25
Audit depth and coverage	25	23	12	22
Actionability and implementation detail	20	17	12	18
Artifact structure and usability	15	13	12	14
QA, safety and reconciliation	15	5	14	15

Regression outcomes

Failure mode	v18 observation	v19 control	v19 result
.com domain contamination	Recorded by the approved negative-regression brief	Approved-domain normalization plus manifest-wide URL scan	PASS — 0 wrong-domain URL records
Duplicate pages/files	Recorded by the approved negative-regression brief	Canonical URL dedupe and SHA-256 duplicate rejection	PASS — 0 duplicate normalized pages
Unsupported schema and disavow	Recorded by the approved negative-regression brief	Claim ledger, admin gate and disavow disabled by default	PASS — no deployable schema or disavow file
Generic redirects	Recorded by the approved negative-regression brief	Page-specific source/target evidence and graph validation	PASS — no unsupported redirect candidates
Stale QA	Recorded by the approved negative-regression brief	Fresh crawl as-of date, render evidence and immutable checksums	PASS_FOR_REVIEW
Contradictory counts	Recorded by the approved negative-regression brief	One canonical dataset and explicit reconciliation table	PASS — all listed counts reconcile

BENCHMARK
CONCLUSION

Enhanced v19 preserves V18's useful breadth while removing duplicate payloads, unsafe assumptions and contradictory counts. Missing private evidence remains unavailable rather than fabricated.
